Subject: Microsoft punishment... HA!

The idea of making Microsoft "donate" hardware and software to schools for punishment is rediculous. That would strenthen their monopoly more than anything. Not a good idea to punish Microsoft by destroying Apple...

Make them donate CASH to schools to purchase whatever equipment they choose...

"Daddy, I'm sorry you caught me stealing your wallet".

"Son, for your punishment, I'm going to give you a million dollars. Will that teach you a lesson?"

Duh...
